

## Safety Data Sheet

---

### 1. Chemical product and company identification

Product name : 1-Allyl-3-methylimidazolium iodide

#### Company information

Name of manufacturer : KANTO CHEMICAL CO., INC.  
Address : 2-1, Nihonbashi, Muromachi 2-Chome, Chuo-Ku, Tokyo, 103-0022, JP  
Name of section : Business Administration Department, Reagent Division  
Telephone number : +81-3-6214-1090  
Facsimile number : +81-3-3241-1047  
Mail address : BC32@kanto.co.jp  
Reference No : 01120  
Recommended use : For research use only  
Restrictions on use : Seek expert judgment when using the product for applications other than those recommended.

### 2. Hazards identification

#### GHS classification

|                |                                   |             |
|----------------|-----------------------------------|-------------|
| Health hazards | Skin corrosion/irritation         | Category 2  |
|                | Serious eye damage/eye irritation | Category 2A |

Hazard  
pictograms

Signal word : Warning

Hazard statements : Causes skin irritation  
Causes serious eye irritation

#### Precautionary statements

Prevention : Wash hands, forearms and face thoroughly after handling.  
Wear protective gloves/protective clothing/eye protection/face protection.

Response : IF ON SKIN: Wash with plenty of water.  
IF IN EYES: Rinse cautiously with water for several minutes.  
Remove contact lenses, if present and easy to do. Continue rinsing.  
Specific treatment (see supplemental first aid instruction on this label).  
If skin irritation occurs: Get medical advice/attention.  
If eye irritation persists: Get medical advice/attention.  
Take off contaminated clothing and wash it before reuse.

### 3. Composition/information on ingredients

Distinction of substance or mixture : Substance

| Chemical name                      | Concentration (%) | Formula                                        | TSCA       | EC-No. | CAS RN     |
|------------------------------------|-------------------|------------------------------------------------|------------|--------|------------|
| 1-Allyl-3-methylimidazolium iodide | 100               | C <sub>7</sub> H <sub>11</sub> IN <sub>2</sub> | Not listed | -      | 65039-07-8 |

## 4. First aid measures

### First aid measures

|                                               |                                                                                                             |
|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------|
| First-aid measures after inhalation           | : Remove the victim to fresh air, and make him blow his nose and gargle.                                    |
| First-aid measures after skin contact         | : Wash the affected areas under running water.                                                              |
| First-aid measures after eye contact          | : Wash the affected areas under running water for at least 15 minutes. If necessary, get medical treatment. |
| First-aid measures after ingestion            | : Give the victim water or salt water and make him vomit. Get medical attention.                            |
| Personal Protection in First Aid and Measures | : Rescuers should wear proper protective equipment like rubber gloves, goggles.                             |

## 5. Fire fighting measures

|                                          |                                                                                                                                                                                                                                                                                                        |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable extinguishing media             | : Water, dry chemical powder, carbon dioxide, dry sand, foam                                                                                                                                                                                                                                           |
| Unsuitable extinguishing media           | : None                                                                                                                                                                                                                                                                                                 |
| Firefighting instructions                | : Move containers from fire area if it can be done without risk, if not possible, apply water from a safe distance to cool and protect surrounding area.<br><br>Dry chemical powder, carbon dioxide or dry sand should be used for small fires. Foam extinguisher is effective for a large scale fire. |
| Personal protection (Emergency response) | : Firefighters should wear protective equipment.                                                                                                                                                                                                                                                       |

## 6. Accidental release measures

### Personal Precautions, Protective Equipment and Emergency Procedures

|                  |                                                                                                                                                     |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| General measures | : Wear proper protective equipment and avoid contact with skin and inhalation of dust. Conduct operations from upwind and evacuate people downwind. |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|

### Environmental precautions

|                           |                                                                                                                                                                                                                                            |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Environmental precautions | : Attention should be given to avoid discharge of spilled product into rivers and resulting environmental damage. When diluting spill with large amounts of water, discharge of untreated wastewater into the environment must be avoided. |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Methods and Equipment for Containment and Cleaning up

|                 |                                                                                                  |
|-----------------|--------------------------------------------------------------------------------------------------|
| For containment | : Sweep up in a chemical waste container. Flush contaminated area with copious amounts of water. |
|-----------------|--------------------------------------------------------------------------------------------------|

## 7. Handling and storage

### Handling

|                    |                                                                                           |
|--------------------|-------------------------------------------------------------------------------------------|
| Technical measures | : Wear appropriate protective equipment to avoid contact with skin or inhalation of dust. |
|--------------------|-------------------------------------------------------------------------------------------|

Precautions for safe handling : Use in well-ventilated areas.  
Do not allow contact with oxidizing substances.

### Storage

Storage conditions : Store in a dark, cool place and tightly closed.  
Material used in packaging/containers : Glass, fluorine resin.

## 8. Exposure controls / Personal protection equipment

|           |                 |
|-----------|-----------------|
| ACGIH TWA | Not established |
|-----------|-----------------|

Appropriate engineering controls : Use with an enclosed system or a local exhaust ventilation.

### Protective equipment

Respiratory protection : If necessary, wear dust mask  
Hand protection : Impervious protective gloves  
Eye protection : Safety goggles  
Skin and body protection : Protective clothing, protective boots

## 9. Physical and chemical properties

Physical state : Solid  
Color : White  
Odor : Odorless  
pH : No data available  
Melting point : 56 ° C  
Freezing point : No data available  
Boiling point : No data available  
Flash point : No data available  
Auto-ignition temperature : No data available  
Decomposition temperature : No data available  
Flammability : Flammable solid  
Vapor pressure : No data available  
Relative density : No data available  
Density : No data available  
Relative gas density : No data available  
Solubility : Water: Soluble. Organic solvents: Soluble in methanol, ethanol, acetonitrile and acetone.  
Partition coefficient n-octanol/water (log Pow) : No data available  
Explosive limits (vol %) : No data available  
Viscosity, kinematic : No data available  
Particle characteristics : No data available

## 10. Stability and reactivity

Reactivity : May react with oxidizing substances.  
Chemical stability : Stable under normal conditions.

---

|                                    |                                                              |
|------------------------------------|--------------------------------------------------------------|
| Possibility of hazardous reactions | : Stable under normal conditions of use.                     |
| Conditions to avoid                | : Light, heat.                                               |
| Incompatible materials             | : Oxidizing substances.                                      |
| Hazardous decomposition products   | : Carbon monoxide, nitrogen oxides, iodine, hydrogen iodide. |

## 11. Toxicological information

|                               |                                                                                                                                                                                                                                        |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acute toxicity (oral)         | : Classification not possible                                                                                                                                                                                                          |
| Acute toxicity (dermal)       | : Classification not possible                                                                                                                                                                                                          |
| Acute toxicity (inhalation)   | : No classification (gas)<br>Classification not possible (vapor)<br>Classification not possible (dust, mist)                                                                                                                           |
| Skin corrosion/irritation     | : Causes skin irritation<br>Since the substance causes skin irritation, it was classified into category 2.                                                                                                                             |
| Serious eye damage/irritation | : Causes serious eye irritation<br>Since the substance causes eye irritation, it was classified into category 2A.                                                                                                                      |
| Respiratory sensitization     | : Classification not possible                                                                                                                                                                                                          |
| Skin sensitization            | : Classification not possible<br>As relevant notes, iodine and its compounds were classified as "group 2 for skin sensitizer" by Japan Society for Occupational Health, but all substances in this compound group were not identified. |
| Germ cell mutagenicity        | : Classification not possible                                                                                                                                                                                                          |
| Carcinogenicity               | : Classification not possible<br>As relevant notes, ACGIH classifies iodine compounds as A4 (not classifiable as a human carcinogen).                                                                                                  |
| Reproductive toxicity         | : Classification not possible                                                                                                                                                                                                          |
| STOT-single exposure          | : Classification not possible<br>May cause respiratory tract irritation.                                                                                                                                                               |
| STOT-repeated exposure        | : Classification not possible                                                                                                                                                                                                          |
| Aspiration hazard             | : Classification not possible                                                                                                                                                                                                          |

## 12. Ecological information

### Ecotoxicity

|                 |                               |
|-----------------|-------------------------------|
| Aquatic acute   | : Classification not possible |
| Aquatic chronic | : Classification not possible |

### Persistence and degradability

No additional information available

### Bioaccumulative potential

No additional information available

### Mobility in soil

No additional information available

### Hazardous to the ozone layer

|       |                               |
|-------|-------------------------------|
| Ozone | : Classification not possible |
|-------|-------------------------------|

### 13. Disposal considerations

- Ecological waste information : Mixed with flammable organic solvents and burn in a chemical incinerator equipped with an afterburner and a scrubber. Or entrust approved waste disposal companies with the disposal. The incinerator should be suitable for burning organic halogen compounds.
- Alkaline solution should be used for cleaning liquid of the scrubber.
- Contaminated container and packaging : In case of disposal of empty bottles, dispose bottles after removing the content thoroughly.

### 14. Transport information

#### International Regulations

##### Transport by sea(IMDG)

- UN-No. (IMDG) : Not applicable
- Proper Shipping Name (IMDG) : Not applicable
- Packing group (IMDG) : Not applicable
- Transport hazard class(es) (IMDG) : Not applicable

##### Air transport(IATA)

- UN-No. (IATA) : Not applicable
- Proper Shipping Name (IATA) : Not applicable
- Packing group (IATA) : Not applicable
- Transport hazard class(es) (IATA) : Not applicable

- Marine pollutant : Not applicable

### 15. Regulatory information

Regulatory information with regard to this substance in your country or region should be examined by your own responsibility.

### 16. Other information

- Data sources : Dictionary of Organic Compounds, The society of Synthetic Organic Chemistry, Kodansha Ltd. (1985) .  
NITE Chemical Risk Information Platform (NITE-CHRIP), National Institute of Technology and Evaluation.

The information contained herein is based on several references and the present state of our knowledge. However the SDS does not always cover all information about the product, handle the product carefully. The information is intended to ordinary usage, in case of particular handlings, conduct appropriate safety measurements. The information herein is only provision of information, and it does not represent a guarantee the properties of the product. The Safety Data Sheet(SDS) is prepared based on JIS Z7253.
