

## Safety Data Sheet

---

### 1. Chemical product and company identification

Product name : Calcium iodide n-hydrate

#### Company information

Name of manufacturer : KANTO CHEMICAL CO., INC.  
 Address : 2-1, Nihonbashi, Muromachi 2-Chome, Chuo-Ku, Tokyo, 103-0022, JP  
 Name of section : Business Administration Department, Reagent Division  
 Telephone number : +81-3-6214-1090  
 Facsimile number : +81-3-3241-1047  
 Mail address : BC32@kanto.co.jp  
 Reference No : 07072  
 Recommended use : For research use only  
 Restrictions on use : Seek expert judgment when using the product for applications other than those recommended.

### 2. Hazards identification

#### GHS classification

Health hazards	Serious eye damage/eye irritation	Category 2B
	Reproductive toxicity	Category 1B
	Reproductive toxicity (effects on or via lactation)	Additional category
	Specific target organ toxicity (single exposure)	Category 1 (thyroid)
	Specific target organ toxicity (repeated exposure)	Category 1 (skin, thyroid, systemic toxicity)

Hazard pictograms

Signal word : Danger

Hazard statements : Causes eye irritation  
 May damage fertility or the unborn child  
 May cause harm to breast-fed children  
 Causes damage to organs (thyroid)  
 Causes damage to organs (skin, thyroid, systemic toxicity) through prolonged or repeated exposure

#### Precautionary statements

Prevention : Do not handle until all safety precautions have been read and understood.  
 Do not breathe dust.  
 Avoid contact during pregnancy and while nursing.  
 Wash hands, forearms and face thoroughly after handling.  
 Do not eat, drink or smoke when using this product.  
 Wear protective gloves/protective clothing/eye protection/face protection.

Response	: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Call a POISON CENTER or doctor. IF exposed or concerned: Get medical advice/attention. Get medical advice/attention if you feel unwell. If eye irritation persists: Get medical advice/attention.
Storage	: Store locked up.
Disposal	: Dispose of contents/container to hazardous or special waste collection point, in accordance with local, regional, national and/or international regulation.

### 3. Composition/information on ingredients

Distinction of substance or mixture : Substance

Chemical name	Concentration (%)	Formula	TSCA	EC-No.	CAS RN
Calcium iodide n-hydrate	78 - 84	CaI <sub>2</sub> · nH <sub>2</sub> O (n=approx. 3.3)	Not listed	-	71626-98-7

\*Concentration : as CaI<sub>2</sub>.

### 4. First aid measures

#### First aid measures

First-aid measures after inhalation	: Remove the victim to fresh air, and make him blow his nose and gargle.
First-aid measures after skin contact	: Wash the affected areas under running water.
First-aid measures after eye contact	: Wash the affected areas under running water for at least 15 minutes. If necessary, get medical treatment.
First-aid measures after ingestion	: Give the victim water immediately. Call a physician immediately.
Personal Protection in First Aid and Measures	: Rescuers should wear proper protective equipment like rubber gloves, goggles.

### 5. Fire fighting measures

Suitable extinguishing media	: This product is noncombustible.
Unsuitable extinguishing media	: None
Firefighting instructions	: Move containers from fire area if it can be done without risk, if not possible, apply water from a safe distance to cool and protect surrounding area.
Personal protection (Emergency response)	: Firefighters should wear protective equipment.

### 6. Accidental release measures

#### Personal Precautions, Protective Equipment and Emergency Procedures

General measures	: Wear proper protective equipment and avoid contact with skin or inhalation of dust.
------------------	---

**Environmental precautions**

Environmental precautions : Attention should be given to avoid discharge of spilled product into rivers and resulting environmental damage. When diluting spill with large amounts of water, discharge of untreated wastewater into the environment must be avoided.

**Methods and Equipment for Containment and Cleaning up**

For containment : Sweep up in a chemical waste container. Flush contaminated area with copious amounts of water.

**7. Handling and storage****Handling**

Technical measures : Wear appropriate protective equipment to avoid contact with skin or inhalation of dust.

Precautions for safe handling : Avoid formation of dust and aerosols.

**Storage**

Storage conditions : As the chemical is deliquescent, keep the bottle tightly closed and store in a cool place.

Material used in packaging/containers : Glass, polyethylene, polypropylene.

**8. Exposure controls / Personal protection equipment**

ACGIH TWA	0.01 ppm (IFV)
-----------	----------------

Appropriate engineering controls : Install a local ventilation system in case of dusty condition.

**Protective equipment**

Respiratory protection : Dust mask

Hand protection : Impervious protective gloves

Eye protection : Safety goggles

Skin and body protection : Protective clothing, protective boots

**9. Physical and chemical properties**

Physical state : Solid

Color : White - light brown

Odor : Odorless

pH : No data available

Melting point : 42 ° C (as hexahydrate)

Freezing point : No data available

Boiling point : 160 ° C (as hexahydrate)

Flash point : No data available

Auto-ignition temperature : No data available

Decomposition temperature : No data available

Flammability : Non flammable.

Vapor pressure : No data available

Relative density : No data available

Density : No data available

---

Relative gas density	: No data available
Solubility	: Organic solvents: Soluble in alcohol. Water: 754 g/100mL (0°C, as hexahydrate)
Partition coefficient n-octanol/water (log Pow)	: No data available
Explosive limits (vol %)	: No data available
Viscosity, kinematic	: No data available
Particle characteristics	: No data available

## 10. Stability and reactivity

Reactivity	: May react with oxidizing substances.
Chemical stability	: Stable under normal conditions. Deliquescent. It absorbs carbon dioxide from the air and liberates iodine to color. In addition, iodine is liberated and colored by light.
Possibility of hazardous reactions	: Stable under normal conditions of use.
Conditions to avoid	: Light, heat, moisture.
Incompatible materials	: Oxidizing substances.
Hazardous decomposition products	: Iodine, hydrogen iodide.

## 11. Toxicological information

Acute toxicity (oral)	: Classification not possible
Acute toxicity (dermal)	: Classification not possible
Acute toxicity (inhalation)	: No classification (gas) No classification (vapor) Classification not possible (dust, mist)
Skin corrosion/irritation	: Classification not possible
Serious eye damage/irritation	: Causes eye irritation No data available for this substance. In a test in which 100 mg / 24h of this substance was applied to the eyes of rabbits, it showed moderate irritation. In addition, potassium iodide is classified into category 2B based on the following test. thus , it was classified into category 2B.
Respiratory sensitization	: Classification not possible
Skin sensitization	: Classification not possible Besides, Japan Society for Occupational Health classified iodine and its compounds as a skin sensitizer group 2, but there is a cautionary statement that not all compounds were identified.
Germ cell mutagenicity	: Classification not possible
Carcinogenicity	: No classification ACGIH classifies iodine compounds as A4 (not classifiable as a human carcinogen).

---

Reproductive toxicity	: May damage fertility or the unborn child May cause harm to breast-fed children Excessive iodine ingestion in humans causes thyroid failure, and effects on sexual function such as menstrual abnormality could occur as secondary effects, and there is the information that absorbed iodine is excreted into body milk, and it is possible that iodine transferred to newborns via body milk causes developmental disorder in infants. Because it is hard to say that there is sufficient evidence of reproductive toxicity caused by excessive exposure to iodide in humans, the substance was classified into category 1B in this hazard class, and the category of effects by lactation was added.
STOT-single exposure	: Causes damage to organs (thyroid) Based on evidence that acute, excessive intakes of iodine transiently decrease the production of thyroid hormones, the substance was classified into category 1 (thyroid) considering the effects on thyroid.
STOT-repeated exposure	: Causes damage to organs (skin, thyroid, systemic toxicity) through prolonged or repeated exposure No data available for this substance. Based on the information on potassium iodide, it was classified into category 1 (skin, thyroid, systemic toxicity). Potassium iodide : In the oral administration of this substance as drug therapy, iodine eruption is observed. Furthermore, by excessive oral exposure to this substance, hypothyroidism was found, but on the other hand, cases showing hyperthyroidism were also reported. Besides these, as serious adverse effects in long-term repeated use, other than lesions in skin and thyroid, laryngitis, bronchitis, glottal edema, asthmatic attack, salivary gland edema, parotitis, gastritis, along with iodine cachexia such as generalized weakness, palpitation, depression, sleeplessness, and nervousness are listed as iodine poisoning. As above, other than skin and thyroid, various systemic signs for which it is difficult to identify a target organ were observed. Therefore, the substance was classified into category 1 (skin, thyroid, systemic toxicity).
Aspiration hazard	: Classification not possible

## 12. Ecological information

### Ecotoxicity

Aquatic acute	: Classification not possible
Aquatic chronic	: Classification not possible

### Persistence and degradability

No additional information available

### Bioaccumulative potential

No additional information available

### Mobility in soil

No additional information available

### Hazardous to the ozone layer

Ozone	: Classification not possible
-------	-------------------------------

### 13. Disposal considerations

Ecological waste information	: Dilute with copious water and adjust the pH to neutral, then flush in drains. Or entrust approved waste disposal companies with the disposal.
Contaminated container and packaging	: In case of disposal of empty bottles, dispose bottles after removing the content thoroughly.

### 14. Transport information

#### International Regulations

##### Transport by sea(IMDG)

UN-No. (IMDG)	: Not applicable
Proper Shipping Name (IMDG)	: Not applicable
Packing group (IMDG)	: Not applicable
Transport hazard class(es) (IMDG)	: Not applicable

##### Air transport(IATA)

UN-No. (IATA)	: Not applicable
Proper Shipping Name (IATA)	: Not applicable
Packing group (IATA)	: Not applicable
Transport hazard class(es) (IATA)	: Not applicable

Marine pollutant	: Not applicable
------------------	------------------

### 15. Regulatory information

Regulatory information with regard to this substance in your country or region should be examined by your own responsibility.

### 16. Other information

Data sources	: Encyclopaedia Chimica, Kyoritsu Shuppan Co, Ltd. (1963) . Dangerous Properties of Industrial Materials, 6th ed. N. I. Sax Van Nostrand Reinhold Company (1984) . Handbook of 17322 Chemical Products, The Chemical Daily Co. (2022) . NITE Chemical Risk Information Platform (NITE-CHRIP), National Institute of Technology and Evaluation.
