Safety Data Sheet

1. Chemical product and company identification

Product name : Copper, chips

Company information

Name of manufacturer : KANTO CHEMICAL CO., INC.

Address : 2-1, Nihonbashi, Muromachi 2-Chome, Chuo-Ku, Tokyo, 103-0022, JP

Name of section : Business Administration Department, Reagent Division

Telephone number : +81-3-6214-1090Facsimile number : +81-3-3241-1047Mail address : BC32@kanto.co.jp

Reference No : 07438

Recommended use : For research use only

Restrictions on use : Seek expert judgment when using the product for applications other

than those recommended.

2. Hazards identification

GHS classification

Health hazards Skin sensitization Category 1A

Specific target organ toxicity Category 1 (digestive organs)

(single exposure)

(single exposure)

Hazard pictograms

Signal word : Danger

Hazard statements : May cause an allergic skin reaction

May cause respiratory irritation

Causes damage to organs (digestive organs)

Precautionary statements

Prevention : Do not breathe dust.

Wash hands, forearms and face thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area.

Contaminated work clothing should not be allowed out of the

workplace.

Wear protective gloves/protective clothing/eye protection/face

protection.

Response : IF ON SKIN: Wash with plenty of water.

 $\ensuremath{\mathsf{IF}}$ INHALED: Remove person to fresh air and keep comfortable for

breathing.

IF exposed or concerned: Call a POISON CENTER or doctor. Call a POISON CENTER or doctor if you feel unwell.

If skin irritation or rash occurs: Get medical advice/attention.

Take off contaminated clothing and wash it before reuse.

Issue date: 10/20/2003 Revision date: 4/2/2024

Page

2/6

Storage : Store in a well-ventilated place. Keep container tightly closed.

Store locked up.

Disposal : Dispose of contents/container to hazardous or special waste

collection point, in accordance with local, regional, national

and/or international regulation.

3. Composition/information on ingredients

mixture

Chemical name	Concentration (%)	Formula	TSCA	EC-No.	CAS RN
Copper	≥ 99.85	Cu	Listed	231-159-6	7440-50-8

4. First aid measures

First aid measures

First-aid measures after : Remove the victim to fresh air, and make him blow his nose and

inhalation gargle.

contact

: Wash the affected areas under running water.

 $First-aid\ measures\ after\ eye$

First-aid measures after skin

contact

: Wash the affected areas under running water.

First-aid measures after

ingestion

: Give the victim water or salt water and make him vomit. Get

medical attention.

Personal Protection in First

Aid and Measures

: Rescuers should wear proper protective equipment like rubber

gloves, goggles.

5. Fire fighting measures

Suitable extinguishing media : This product is noncombustible.

Unsuitable extinguishing media : Non

Firefighting instructions : Move containers from fire area if it can be done without risk, if

not possible, apply water from a safe distance to cool and

protect surrounding area.

Personal protection (Emergency

response)

: Firefighters should wear protective equipment.

6. Accidental release measures

Personal Precautions, Protective Equipment and Emergency Procedures

General measures : Wear proper protective equipment and avoid contact with skin and

inhalation of dust. Conduct operations from upwind and evacuate

people downwind.

Environmental precautions

Environmental precautions : Attention should be given to avoid damage to the environment by

flowing of spillage to rivers.

Methods and Equipment for Containment and Cleaning up

For containment : Sweep up the chemical and place in a chemical waste container.

Issue date: 10/20/2003 Revision date: 4/2/2024

Page

3/6

7. Handling and storage

Handling

Technical measures : Wear appropriate protective equipment to avoid contact with skin

or inhalation of dust.

Precautions for safe handling : Avoid formation of dust and aerosols.

Storage

Storage conditions : Store in a dark, cool place and tightly closed.

Material used in : Glass, polyethylene, polypropylene.

packaging/containers

8. Exposure controls / Personal protection equipment

ACGIH TWA 0.2 mg/m³ (Fume), 1mg/m³ (Dust)

Appropriate engineering

controls

: Install a local ventilation system in case of dusty condition.

Protective equipment

Respiratory protection : If necessary, wear dust mask

Hand protection : Impervious protective gloves

Eye protection : Safety goggles

Skin and body protection : Protective clothing, protective boots

9. Physical and chemical properties

Physical state : Solid

Color : Reddish gold
Odor : Odorless

pH : No data available

Melting point : 1083 $^{\circ}$ C

Freezing point : No data available

Boiling point : 2582 $^{\circ}$ C

Flash point : No data available
Auto-ignition temperature : No data available
Decomposition temperature : No data available
Flammability : Non flammable.
Vapor pressure : No data available

Relative density : 8.92 (20°C)

Density : No data available
Relative gas density : No data available
Solubility : Water: Insoluble.
Partition coefficient n- : No data available

octanol/water (log Pow)

Explosive limits (vol %) : No data available
Viscosity, kinematic : No data available
Particle characteristics : No data available

Issue date: 10/20/2003 Revision date: 4/2/2024

4/6

10. Stability and reactivity

Reactivity In moist air containing carbon dioxide, sulfur dioxide or salts,

> basic carbonates and the like are produced on the surface. When heated in air, it produces copper(II) oxide at temperatures below 1000℃ and copper(I) oxide at temperatures above 1000℃.

Chemical stability Stable under normal conditions. Oxidized gradually in air.

Possibility of hazardous : Mixtures of finely ground copper and chlorates or iodine salts can

reactions

explode due to friction, impact and heating. Conditions to avoid : Light, heat.

Incompatible materials

Hazardous decomposition

products

: Oxidizing substances.

: Copper oxides.

11. Toxicological information

Classification not possible Acute toxicity (oral) Acute toxicity (dermal) Classification not possible Acute toxicity (inhalation) No classification (gas)

No classification (vapor)

Classification not possible (dust, mist)

Skin corrosion/irritation Classification not possible

> In addition, there is a description that "although there are reports of contact dermatitis related to copper, it is a small number of cases caused in the copper metal or copper compound

industry."

Serious eye damage/irritation Respiratory sensitization

Classification not possible Classification not possible

Skin sensitization

May cause an allergic skin reaction

Since copper and its compounds are classified to be skin sensitization group 2 according to Japan Society for Occupational

Health, it was classified into category 1A.

Germ cell mutagenicity

Classification not possible No classification

Carcinogenicity

It was classified into group I (not classifiable as a human

carcinogen) by EPA.

Reproductive toxicity

: Classification not possible

STOT-single exposure

: Causes damage to organs (digestive organs)

May cause respiratory irritation

From knowledge of human, respiratory inhalation route (respiratory

tract irritation) is the main acute toxicity symptoms. When ingested drinking water including a large amount of copper in oral exposure, gastrointestinal symptoms (nausea, vomiting, abdominal pain, etc.) is observed, and there is description that causes nausea, vomiting are main symptoms as main symptoms in many

reports. It was classified into category 1 (digestive organs), and category 3 (respiratory tract irritation).

Classification not possible STOT-repeated exposure

> It has been reported that repeated oral exposure to copper in humans caused gastrointestinal symptoms (nausea, vomiting, abdominal pain, etc.) and liver damage (liver dysfunction, cirrhosis). Since gastrointestinal symptoms include nausea,

vomiting, and abdominal pain, we do not support the classification of target organs. In addition, regarding liver damage, only one case was reported, and it was judged that it could not be

generalized.

Aspiration hazard Classification not possible

Revision date: 4/2/2024

12. Ecological information

Ecotoxicity

Aquatic acute : Classification not possible Aquatic chronic : Classification not possible

Persistence and degradability

No additional information available

Bioaccumulative potential

No additional information available

Mobility in soil

No additional information available

Hazardous to the ozone laver

0zone : Classification not possible

13. Disposal considerations

Ecological waste information Solidification method:

Solidify with cement and bury in a landfill site approved for

hazardous waste disposal.

Or entrust approved waste disposal companies with the

disposal.

Contaminated container and

packaging

: In case of disposal of empty bottles, dispose bottles after

removing the content thoroughly.

14. Transport information

International Regulations Transport by sea (IMDG)

UN-No. (IMDG) Not applicable Proper Shipping Name (IMDG) Not applicable Packing group (IMDG) Not applicable Transport hazard class(es) Not applicable

(IMDG)

Air transport(IATA)

UN-No. (IATA) Not applicable Proper Shipping Name (IATA) Not applicable Packing group (IATA) Not applicable Transport hazard class(es) Not applicable

(IATA)

Marine pollutant : Not applicable

15. Regulatory information

Regulatory information with regard to this substance in your country or region should be examined by your own responsibility.
